Freestyle™ CONVERTIBLE KEYBOARD

KINESIS COMPUTER ERGONOMICS

For PC

Linking cable allows up to 8 inches of separation
Slide release button on each module allows attachment of both the pivot tether and Incline accessory
Embedded 10-key reduces overall length of keyboard allowing for closer reach of any pointing device
Double wide delete and escape (on left module) keys make an easier, quicker target for your fingers to press
Driverless hot keys for commonly used mouse actions
Low-force key action

The new **Freestyle Solo™** convertible is a revolutionary breakthrough in computer keyboard design. Created with input from ergonomists and health professionals, the Freestyle is the first keyboard that allows users to *personalize* their adjustments, adapting to the specific needs of each individual, while providing a stylish accent to any workstation.

Sleek, low profile design.

Freestyle Keyboard Part Number:

KIN-FS-01HY

Your Comfort . . . Offers infinitely variable splay. Addtionally, by removing the Pivot Tether™ the left and right keying modules can be disconnected from each other offering eight inches of complete separation. Perfect for individual needs ranging from a narrow footprint to complete separation. Also available is a custom version offering up to 20 inches of separation.

Your Style . . . With a sleek, low-profile design the Freestyle Solo has a zero degree slope which minimizes the height, effectively creating negative slope and reducing wrist extension. At only 15 3/8" wide the Freestyle Solo creates a narrow footprint. This reduces over-reach issues by allowing closer placement of any pointing device.

Your Choice . . . The Freestyle offers a variety of optional, interchangeable accessories providing features never before available from a single keyboard. This modular design satisfies diverse user needs and allows organizations to standardize on a single-source solution.

HYPERTEC MAKING IT PERFORM

KINESIS
COMPUTER ERGONOMICS

Privately-held Kinesis® Corporation, founded in 1991 and located in Bothell, Washington, is a leading force in bringing the science of ergonomics to mainstream computer keyboards and input devices. Kinesis has a rich history of pioneering innovation, beginning with the release of the first commercial ergonomic computer keyboard in the U.S. in 1992.

Today, Kinesis still embodies the spirit of innovation and brings 45 years of combined experience to the design of novel products which improve comfort and productivity for computer users.

Kinesis also serves as a one-stop shop for a variety of computer ergonomic products, providing solutions direct to consumers and to corporations. Through our family of resellers or direct purchases from Kinesis, you can count on value, innovation, and service.

Copyright 2008, Kinesis Corporation. All rights reserved. U.S. and International patents pending. Specifications subject to change without notice. Kinesis is a registered trademark and Freestyle, Freestyle Solo, Freestyle Incline, Freestyle VIP, Freestyle V3, Freestyle Ascent and Pivot Tether are trademarks of Kinesis Corporation. Windows, Macintosh, and Sun are trademarks of Microsoft Corporation, Apple Corporation, and Sun Mircrosystems, respectively. Kinesis keyboards should be used in accordance with established ergonomic guidelines. Because of the complex set of factors believed to contribute to computer-related injuries, Kinesis can make no warranty that its products alone prevent or cure any physical ailment.

Featuring simple, sturdy adjustment mechanisms, the Freestyle is intuitive to configure and use. Interchangable accessories provide features never before available from just one keyboard design.

Multiple configurations in one modular product.

Four optional accessory packages can be purchased to provide additional capabilities. These configurations allow the user to choose features that offer complete separation, adjustable front splay, adjustable or fixed tenting, with or without integrated and removable padded palm supports.

Freestyle Incline™ Accessory

- 10 degrees fixed tenting of keying modules.
- Adjustable splay (up to 30 degrees).
- Keying modules can be locked at any given splay angle.
- Padded palm supports.
- Ideal replacement for fixed split and tented keyboards such as the Microsoft Natural.

Freestyle VIP™ Accessory

V-lifter and **I**ntegrated **P**alm Supports.

- Attach easily to Solo Keyboard.
- Allows quick, reproducible slope settings of 10 and 15 degrees.
- Ideal replacement for other complicated, unstable or hard-to-tent keyboards.
- Integrated, padded palm supports keep wrists neutral while resting.
- Use with or without the pivot tether for greater separation.
- Provides a highly stable typing platform with no "bounce".
- For individuals that require tenting, variable splay and/or separation with integrated palm supports.
- Solo keyboard sold separately.
